1. THE COURSE DESCRIPTION

Name of indicators	Distribution of hours according to the curriculum	
	Full-time education	External form of education
Number of credits ECTS – 4	Year of training: 1 st	
Total number of hours – 120 hours	120hours	120hours
Number of modules – 2	Semester:	
Weekly hours for full-time education: 3 classroom – 48 Students' Individual Work – 72	2	2
	Lectures:	
	20	8
	Practical (seminars):	
	28	8
Type of final assessment: exam	Laboratory:	
	–	–
Form of final assessment: combined	Individual work:	
	72	104

2. PURPOSE OF THE COURSE

The purpose of studying the discipline “Tourist Routes of Transcarpathia” is to form special knowledge, skills and abilities of students in the development of new tourist routes, types of tourist routes in the Transcarpathian region, to train highly qualified tourism workers who can provide qualified information during tourist routes, methods of tourist process, development of elements of professional skill of the future expert.

The main tasks of studying the discipline are theoretical and practical training of students on: theory and methods of tourist and excursion business; pedagogical equipment of tourist and excursion work; formation of organizational, communicative and analytical skills; apply in practice the principles and methods of organization and technology of tourist services during the various tourist routes in the Transcarpathian region, identify tourist documentation for the development of tourist routes and other related documents, be able to use it to analyze the needs of a group of tourists and use the necessary forms; independently prepare a tourist route and a set of documents for it; apply the skills of productive communication with consumers of tourist services in the Transcarpathian region, professionally perform tasks in uncertain and extreme situations, especially in extreme routes in the Transcarpathian region.

Subject - methodological principles of tourist route organization, mechanisms of perception of tourist information; ways to attract, concentrate and divert the attention of tourists; logical requirements for the submission of tourist and excursion material.

According to the educational program, the study of this discipline contributes to the formation of higher education in the following competencies:

- 1) integrated competence - the ability to set and successfully solve at a sufficient professional level complex research and practical tasks, to generalize the practice of tourism, to predict the directions of their development, to solve professional problems and practical tasks in the field of tourism both in education and in work process that involves research and / or innovation and is characterized by uncertainty of conditions and requirements
- 2) general competencies:
 - GC 01 To act on the basis of understanding the humanitarian values and globalization processes, priorities of national development;
 - GC 03 Ability to work in the international and domestic professional environment;
 - GC 04 Fluency and ability to communicate in business English and other foreign language (s) within the framework of professional activity;
 - GC 13 Ability to process and interpret using basic knowledge necessary for professional activity;
 - GC 8. Ability to time management
 - GC 9. Ability to motivate people and move towards a common goal;
- Professional, subject competencies:
 - PC 01. Ability to define basic scientific concepts and categories, methodologies of tourism (tourism) and apply them in professional activities;
 - PC 08 Ability to implement international experience of recreational and tourist activities;
 - PC 11. Ability to manage information;

3. PREREQUISITES FOR STUDYING THE COURSE

Prerequisites for studying the discipline “**Tourist Routes of Transcarpathia**” are mastering such educational disciplines (ED) of the educational program (EP):

- 1.1.1. Translation training
- 1.2.1. Tourismology
- 1.2.4. Innovative technologies in tourism
- 1.2.5. Quality management of tourist services

4. EXPECTED LEARNING OUTCOMES

According to the educational-professional program, the Master's degree in “Tourism” study of the discipline “**Tourist Routes of Transcarpathia**” should ensure the higher education students to achieve such program learning outcomes. (PLO):

Program learning outcomes	Code of PLO
Knowledge of advanced concepts, methods of research and professional activities on the border of subject areas of tourism	PLO01
Ability to understand and apply in theory the methodology of the system of sciences that shape tourism.	PLO02
Practice the use of foreign language(s) in professional activities	PLO10
Act in a multicultural environment	PLO 11
Demonstrate the ability to self-development and self-improvement throughout life	PLO16

Expected learning outcomes to be achieved after mastering the discipline “**Tourist Routes of Transcarpathia**”:

Expected learning outcomes of the discipline	Code of PLO
Know the subject, tasks, structure, operate with the basic concepts of the discipline	PLO 01
Know, understand and be able to use in practice the main provisions of tourism legislation in Ukraine in general and the Transcarpathian region in particular, national and international standards for tourist services while visiting Transcarpathia	PLO 01
Understand the role of tourism services in the context of the tourism industry	PLO 02
To know, understand and be able to use in practice the basic concepts of the theory of this tourist discipline, the organization of tourist routes in the Transcarpathian region and tourist activity of the subjects of the market of tourist services of Transcarpathia	PLO 02
Identify tourist documentation for the development of tourist routes and other related documents, be able to use it properly	PLO 10
Be able to develop different types of tourist routes taking into account the cognitive needs of tourists and apply innovations to improve tourist and excursion services	PLO 10
Know the native and foreign language (s) at a level sufficient to carry out professional activities to serve foreign tourists when passing tourist routes in Transcarpathia	PLO 11
Apply the skills of productive communication with consumers of tourist services in the Transcarpathian region.	PLO 11
Act in accordance with the principles of social responsibility in the context of tourist routes of Transcarpathia and civic consciousness	PLO 16

Manage your education for self-realization in the professional tourism field, gaining the necessary theoretical knowledge and practical skills to develop and implement tourist routes in Transcarpathia	PLO 16
--	--------

5. DIAGNOSTICS AND CRITERIA FOR EVALUATION OF LEARNING RESULTS

Assessment tools and methods for demonstrating learning outcomes

Means of assessment and methods of demonstrating learning outcomes in the discipline are: 1) full-time study - current (reports in seminars, development of a tourist route, test tasks on the topic), modular and final semester control in the form of credit; 2) on the correspondence form of training - current control, performance of control work which is the admission to the final semester control in the form of examination. Assessment tools and methods for demonstrating learning outcomes

Assessment tools and methods for demonstrating learning outcomes in the disciplines are:
 problem-oriented innovative educational technologies;
 lecture with pre-planned mistakes;
 lecture-conference;
 method of initiative self-learning;
 information-receptive;
 illustrative;
 reproductive;
 heuristic;

The following forms of control are used to assess the knowledge of students:

1. Oral (the student's answer to a separate question of the topic, a conversation during the consideration of the problem questions, defense of the presentation or project).
2. Written (individual work, current test, modular test).
3. Verification of the level of academic achievements of applicants in the discipline is carried out on the basis of the results of modular tests and final control.

Forms (methods) of control and criteria for evaluating learning outcomes

Forms of current control: performance of practical tasks, speeches at seminars, performance of test tasks on the topic.

Form of modular control: modular control work or testing (written).

Form of final semester control: exam.

Distribution of points received by applicants for higher education (module 1)

Ongoing assessment and independent work				Modular control work	Total
T1	T2	T3	T4	40	100
5	10	15	30		

T1, T2 ... – topics

Distribution of points received by applicants for higher education (module 2)

Ongoing assessment and independent work					Modular control work	Total
T5	T6	T7	T8	T9	50	100
10	10	10	10	10		

T1, T2 ... – topics

Assessment of certain types of educational work in the discipline

Type of activity of the student of higher education	Module 1		Module 2	
	Quantity	Maximum number of points (total)	Quantity	Maximum number of points (total)
Practical (seminar) classes	5	30	6	40
Written testing in thematic assessment	1	5	2	10
Development of a thematic tour	1	25	–	–
Modular control work	1	40	1	50
Total		100		100

Criteria for evaluating of modular control work

Current control is carried out during practical classes and aims to verify the assimilation of educational material by students. The form of current control during training is determined by the working curriculum of the discipline. During the evaluation of the mastering of each topic for the current educational activity of the applicant, grades are set taking into account the approved evaluation criteria for the respective discipline.

Modular control is the control of students' knowledge after studying the logically completed part of the discipline curriculum of the content module. The frequency of this type of control is determined by the number of content modules during the semester.

Assessment of academic achievements and practical skills of applicants is carried out on a 100-point system. The total number of points per semester in the discipline consists of the arithmetic mean score for the modules and points for the current control.

In case of receiving a positive final grade for the module, the student has the right to refuse to take the exam. In this case, the general final grade is entered in the test report. Provided that if the student wants to improve the final grade in the discipline, he must pass an exam. The results of the current control are not taken into account.

If the student attended less than 50 percent of classes, then the regularity and activity of his work is estimated at 0 points.

Module assessment. After performing the programme of the content module during the term, determined by the dean's office, the current assessment practice is carried out in the written module form or testing. If for objective reasons the applicant misses the module, within the specified period, he/she has the right, with the permission of the dean, to pass (to retake) it within two weeks after the academic backlog.

If applicant for higher education misses the module test, or his/her module assessment is from 0 to 34 points, it's required to pass the module before the final control within the time, specified by teachers of the discipline and agreed by the dean of the faculty.

In the process of assessing the modular test it takes into account the size and accuracy of the tasks:

- a) the grade “excellent” is given for the correct performance of all tasks;
- b) the grade “good” is given for the performance of 75% of all tasks;
- c) the assessment "satisfactory" is given if more than 50% of the given tasks are performed correctly;
- d) the grade “unsatisfactory” is given if less than 50% of the tasks are completed.

The absence from module control work - 0 points.

These ratings are transformed into rating points as follows:

- “5” - 41-50 points;
- “4” - 31-40 points;
- “3” - 21-30 points;

“2” - 1-20 points.

Absence at module testing - 0 points.

Criteria for evaluating the final control

The final modular assessment is based on the results of module testing. Exam grade is determined depending on the rating score, or points for the exam.

The exam is a form of final control of the student's mastering of theoretical and practical material of a separate academic discipline for the semester, which is held as a control measure during the examination session.

Applicants with a semester final rating score of at least 35 points are allowed to take the exam.

The grade of the exam in the national scale (excellent, good, satisfactory, unsatisfactory) and the grade in the ECTS scale is marked on the basis of the semester rating score of the applicant for the discipline as follows:

Table 1

Assessment scale: national and ECTS

Sum of points for all types of educational activities	ECTS score	National grade	
		for exam, course project (work), practice	For credit
90 - 100	A	excellent	credited
82 - 89	B	good	
75 - 81	C		
64 - 74	D	satisfactory	
60 - 63	E		
35 - 59	F	unsatisfactory with the possibility of retaking	not credited but with the possibility of retaking
0 - 34	F	unsatisfactory with compulsory re-study of the discipline	not credited with compulsory re-study of the discipline

Applicants who have not fulfilled the terms of the educational agreement and all types of compulsory work (practical tasks, individual, presentations, synopses, etc) provided according to educational programme, are not allowed to the final (semester) control, as well as the final module assessment of which is less than 35 points. The responsible employee of the dean's office in the statement next to the name of such applicant makes a mark “not allowed”.

Criteria for evaluating the final control of the discipline

- “excellent” (90-100 points, A) deserves that applicant, who showed comprehensive and in-depth knowledge of the programme material, gained the ability to perform freely all the tasks provided according to the programme, mastered the basic and read additional literature, and understands the interconnection of the main concepts of the discipline and their meaning for the future profession;
- good (82-89 points, B) deserves that applicant, who showed full knowledge of the programme material, successfully performs the tasks provided according to the programme, mastered the basic literature recommended by the programme, gained systematic knowledge of the discipline and has strong judgment, but during the answer admitted some inaccuracies;
- “good” (74-81 points, C) deserves that applicant, who showed not full knowledge of the programme material, not always performs successfully the tasks provided according to the programme and is only partially familiar with the basic recommended literature, not gained systematic knowledge of the discipline, hasn't got strong judgment and during the answer admitted some inaccuracies;
- “satisfactory” (64-73 points, D) deserves that applicant applicant who showed partial knowledge of the main programme material, in the amount necessary for further study and future work in the profession, who is able to perform the tasks provided by the programme, but only partially familiar with the basic recommended literature. As a rule, this assessment is given to applicants who have made significant errors in the test, but who partially have the necessary knowledge to eliminate those mistakes with the help of the teacher.
- “satisfactory” (60-63 points, E) deserves that applicant who showed partial knowledge of the main programme material in the amount necessary for further study and future work in the profession, who is, not always able to perform the tasks provided by the programme, only partially familiar with the basic recommended literature. As a rule, this assessment is given to applicants who have made gross errors in response to the test, but who partially have the necessary knowledge to eliminate them with the help of the teacher.
- “unsatisfactory” (35-59 points, FX) is given to the applicant who has identified significant gaps in knowledge of the main programme material, made fundamental errors in the implementation of the tasks provided by the programme.
- “unsatisfactory” (0-34 points, F) is given to the applicant who during the semester made gross mistakes in performing the tasks provided by the programme.

6. CURRICULUM

6.1. The content of the discipline

Module 1 TOURIST ROUTES OF ZAKARPATTYA AS A SCIENCE AND MARKET MECHANISM OF ITS ORGANIZATION

Topic 1. Introduction to the discipline “Tourist routes of Zakarpattya”

General characteristics of Zakarpattya and prerequisites for the development of tourism in the region. History of formation of the tourist industry in Zakarpattya. Overview of attractive sights of the region. Research of natural and historical-cultural tourist resources of each district of Zakarpattya

Literature: 5-7, 20-23

Topic 2. Methods of creating and organizing tourist routes

The concept of tourist route, its role and significance. Types of tourist routes. Methodical principles of development of tourist routes. Marking of tourist routes. Tourist route planning. Stages of development of tourist routes.

Literature: 6-9, 12.

Topic 3. Ways to improve tourist routes and innovations and their implementation. Modern tourist routes of Zakarpattya. Theme routes of Zakarpattya

Patriotic tourist routes: military tourist route “Arpad Line” and “Trails of Opryshkiv”. Healing water tours of Zakarpattya. Tourist route “Geothermal waters of Transcarpathia” (Uzhhorod-Nyzhnye Solotvyno-Mukachevo-Kosyno-Berehovo-Vynohradovo-Velyatyno). Zakarpattya gastronomic way. Zakarpattya salt way. Castles along the salt road. Wine and honey ways of Zakarpattya.

Literature: 1-4,7-10.

Topic 4. Religious and castle tourism in Zakarpattya

Features of religious tourism in Ukraine and Zakarpattya. Routes of modern religious tourism in Ukraine. Religious tourism centers of the region. Churches and monasteries as objects of religious tourism of Zakarpattya. Tourist routes to churches and monasteries of the region. Overview of the most interesting tourist routes to the churches and monasteries of Zakarpattya.

The main trends and features of the development of castle tourism in Ukraine in Zakarpattya. Castles and fortresses as the main tourist attractions of Zakarpattya. Castle "necklace" of Zakarpattya: castle “Palanok”, Uzhhorod, St. Miklos (Chynadiyivskiy), Nevytskyi and others. Overview of the most interesting castle routes in Zakarpattya.

Literature: 8, 11, 15, 21

Module 2. THEORETICAL AND APPLIED ASPECTS OF ORGANIZATION OF TOURIST ROUTES OF ZAKARPATTYA ACCORDING TO THE NEW ADMINISTRATIVE-TERRITORIAL ORGANIZATION

Topic 5. Extreme tourism of Zakarpattya and mountain tourism in the region

Modern forms of extreme tourism of Zakarpattya. Status and prospects of functioning and management of extreme tourism routes. Overview of the main extreme routes in Zakarpattya. Hiking trails of the region; bicycle routes; quad biking; photo tours. Zakarpattya tourist route

Literature: 6-9, 21-22.

Topic 6. Development of tourist routes in the mountainous territory of Zakarpattia. (Tyachiv and Rakhiv districts)

Formation of professional understanding of tourist features of districts in Zakarpattia. Study of tourist and local characteristics of Zakarpattia; tourist routes of Zakarpattia ; prerequisites for the development of tourism in the region, the main stages of formation and development of the tourism industry in Zakarpattia. Development of skills to promote the local tourism product on the national market.

References: 4-8, 15, 18, 25.

Topic 7. Development of tourist routes in Uzhhorod and Mukachevo districts

Modeling of tourist routes in Uzhhorod, Mukachevo districts of Zakarpattia, analysis of tourist and local lore phenomena, events, facts related to the region. Comprehensive study of a certain territory of the UTC(united territorial community)- (village, city, district, region). Study of the peculiarities of the tourist specialization of Zakarpattia at tourist services market, etc.

Literature: 3, 9, 11.

Topic 8. Development of tourist routes in Khust district of Zakarpattia

Modeling of tourist routes in Khust district of Zakarpattia. Gaining the features of the studied area and features of the UTC (united territorial community) attractions

Literature: 5-7, 20.

Topic 9. Development of tourist routes in Berehovo district of Zakarpattia .

Modeling of tourist routes in Berehovo district of Zakarpattia. Gaining the features of the studied area and features of OTG (united territorial community) attractions

Literature: 6, 11, 19, 22.

	Total	72	104

6.4. Individual work

In order to master the material of the discipline "Tourist routes of Transcarpathia", in addition to classroom classes (lectures, practical classes), considerable attention is paid to the individual work of higher education students. In particular, the forms of individual work include:

- elaboration by the applicants of obligatory and additional educational, scientific and educational-methodical sources on the discipline "Tourist routes of Transcarpathia";
- study of the theoretical foundations of the listened lecture material and preparation of abstracts of separate questions for in-depth individual study of the discipline "Tourist routes of Transcarpathia";
- writing essays (the list is given below);
- preparation of tourist and local lore characteristics of Transcarpathian regions (according to the plan) in the form of tables;
- elaboration of normative-legal documents that reflect the process of tourism development in Transcarpathian region;
- work with maps on the location of tourism facilities in the regions of Transcarpathia;
- individual study of certain issues in the discipline "Tourist routes of Transcarpathia";
- preparation for practical classes on the subject "Tourist routes of Transcarpathia";
- preparation for intermediate and final tests of students' knowledge in the discipline "Tourist routes of Transcarpathia", etc.

Topics of essays for individual work of students

1. Specificity and uniqueness of tourist resources of Transcarpathia
2. Characteristics of tourist resources of Mizhhirya district.
3. Development of religious tourism in Transcarpathian region
4. Development of children's tourism in Transcarpathian region
5. Problems and prospects for the development of recreational and tourist activities in Transcarpathia
6. General characteristics of the tourist potential of Transcarpathia
7. Characteristics of tourist resources of Khust district
8. Characteristics of objects of sacred architecture as a component of tourist resources of Khust district
9. General characteristics of the tourist potential of Mukachevo district
10. The most famous resorts of Transcarpathia
11. Characteristics of the most famous tourist places of Uzhhorod district
12. Historical aspects of the formation of environmental protection in Transcarpathia
13. Legal and legislative documents of environmental significance in Transcarpathia
14. Tourism and environmental protection of Transcarpathia.
15. State regulation of tourism in Transcarpathia.
16. The impact of natural conditions on the development of recreation and tourism in Transcarpathia.
17. Recreational attractiveness of Berehovo district.
18. Ecological tourism in Transcarpathia.
19. Sports and tourist recreation of Transcarpathia.
20. Gastronomic tourist events in Transcarpathia
21. Characteristics of tourist resources of Tyachiv district
22. Characteristics of tourist resources of Rakhiv district

7. TOOLS, EQUIPMENT AND SOFTWARE USED BY THE COURSE

Hardware - multimedia projector, laptop.

Software - Moodle e-learning system.

Maps of Ukraine and Zakarpattia region, etc.
