Abstract

Abstract:

The aim of paper is to identify the risks of university aviation education of military pilots at the selected institutions from 1973 to the present using the analysis for the quality teaching process and the interaction of edutants (human factors) teachers and students. The paper is the third part of the study on the above issue of aviation education, which answers the question of the research identification of data. The main motive of our pre-research and historical data analysis is to acquire the knowledge applicable to the creation of new study programs of the Faculty of Aeronautics of the Technical University of Košice (FA) in the study field Transport according to the new descriptions approved by the Accreditation commission. Not everything from the history of aviation education was bad and unusable for the present and the future.
